DETAILED ACTION
EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James Lyndon on January 6, 2005.

IN THE CLAIMS:

Claim 20, line 3, before "the", delete "concerned by" and insert –associated with—

Claim 30, line 1, before "has", delete "it" and insert –the device—

2. The following is an examiner's statement of reasons for allowance: Claims 19-41 are allowable over the prior art. The prior art presented, Maurer and Moles, are equivalent in the art because they both teach valve arrangements. However, Moles teaches an electroosmotic valving mechanism and Maurer teaches a slider element by spring force valving mechanism. There is insufficient motivation to combine the specific elements of the valves as the valves operate using different principles and there is no motivation to combine elements of one with elements of the other.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on
